

EXtract 825M

plastic for welding socket DN25

The Exner models below all accept the REFEX **EC-FT-2001-225 - PT100/1000**

Product description

Extract 825M is a manual driven sensor housing to be attached on process tanks or tubing by welding sockets DN25. The drive unit inserts the sensor into the process medium and back into the cleaning chamber. When reaching the final position of the "measuring" or "service" position a pneumatic position signal responds automatically. Cleaning, rinsing and calibration of the sensor is possible while the process is running. An intergrated PT FE scraper allows the use also in rougher processes.

Applications

- For all kind of Ø12-225mm sensors or Ø12-280mm liquid filled sensors with thread PG13.5 (pH-glass- and ISFET sensors, conductivity- or temperature sensors, turbidity and other optical sensors)
- Chemicals
- Water treatment
- Rough processes

Businesses

Chemical industry, Water, Waste water
